

Sparse Events But With Loud Noises Inbetween

Pétur Eggertsson

April 2019

Version 1 - For 4 -8 Improvisers

Play quiet, staccato sounds with long pauses inbetween. They may sound like a ¼ inch cable going into an amp. Nobody can play at the same time as another player. If that happens, those players must immediately play a very loud and long sound (which may sound like a ground loop) and stop in unison and then continue staccato sounds. Other players continue staccato while others play loud noises unless other staccatos happen simultaneously. The piece finishes when no loud noises happen for a while.
